📍 Hathras, Uttar Pradesh

SUMMARY

Motivated BCA student with a strong foundation in Data Structures, Algorithms, and Full-Stack development. Experienced in solving algorithmic challenges involving Binary Search, Sorting, and Stack-based operations. Passionate about building secure healthcare management systems and integrating hardware solutions with robust software logic.

EDUCATION

Bachelor of Computer Applications (BCA)

GLA University

📅 08/2023 - 06/2026 (Final Year) | 📍 Mathura

KEY PROJECTS

Healthcare Patient Record Management

Final year project focused on patient registration, secure medical record storage, and doctor access control systems. Built with responsive web technologies.

Algorithmic Problem Solving

Developed and documented optimized solutions for core DSA problems including Binary Search, Postfix evaluation, and Insertion Sort.

CERTIFICATIONS

Full-Stack Web Development Foundation

IoT Fundamentals: Arduino & ESP8266

Microsoft Azure Fundamentals (AZ-900)

STRENGTHS

Algorithmic Logic

Proficient in implementing and optimizing core data structures.

Problem Solving

Strong ability to analyze complex data problems and develop solutions.

Quick Learning

Fast to adapt to new technologies like IoT and Cloud computing.

Team Collaboration

Works effectively in development teams to achieve shared goals.

SKILLS

Data Structures Algorithms

Binary Search Stacks & Queues Sorting

Python Java C++ SQL HTML/CSS

Tailwind CSS JavaScript Arduino

NodeMCU Git/GitHub Linux Azure
